

# 3DVISTA APP

ALL YOUR TOURS IN ONE PLACE  
& ALWAYS ACCESSIBLE

Now available for Android and iOS

## BRANDED APP INFO

### OVERVIEW

3DVista España SL offers its 3DVista Mobile App (Android & iOS) as a branded version. Offering the same functions, the client's app will feature his/her name and brand and automatically include all tours on client's 3DVista hosting account.

### CREATION OF PERSONALIZED 3DVISTA APP (Android & iOS)

The creation of a Branded App is a "one-time job", so **you will not depend** on any work by us in the future in order to update your virtual tours or content inside. We create the framework and link it to your hosting account(s), so that anything you add, change or delete on there will be **automatically mirrored inside your app**. This makes you completely independent from 3DVista.

We commit to updating your app from a technical standpoint for a period of 2 years after contract, to make sure it will always work on iOS and Android, no matter the changes they come up with.

We will modify 3DVista’s standard application (as it can be found on the Android Store today) for iOS and Android as follows:

- **APP ICON & NAME:** Replacing 3DVista App Icon with client’s own icon and app name.

- **SPLASH SCREEN:** Replacing Loading/Splash Screen with client’s one (to be provided by client or as extra service)

Depending on whether you want to create an app with several virtual tours or with only one virtual tour, please read the respective chapter.

## A) APP CONTAINING 1 VIRTUAL TOUR

Immediately after the app's Splash screen, the tour will load. You will see the tour's loading screen and subsequently the first media. The user will be able to navigate through the tour just as he would in a virtual tour on a website or received via link. If your tour carries a VR button, it can be seen in VR inside the app as well. This allows the user to put his device into a VR headset and see the virtual tour in virtual reality.

## B) APP CONTAINING SEVERAL VIRTUAL TOURS

Immediately after the app's Splash screen, the 3DVista app will display a Home Screen, which shows a carousel section of "Highlighted Tours" and two tabs on the bottom.

- **DELETE OR REPLACE** "Highlighted Tours" Section featured in Standard 3DVista App (to keep your app focused on YOUR contents) with your own virtual tours or jpg.

- **ONLINE TAB:** There are two options for the Online Tab, depending on the purpose of your app
  - **Without Log-in:** Leads straight to a list of virtual tours that are **publicly visible to anyone** who downloads your app. Anyone will be able to download the tours so that they appear in his/her Offline tab and can be seen without connection. You will be showing the **same virtual tours to any user** of your app (one tour or 3DVista Hosting account will be linked to this tab). App content

will dynamically adjust and update according to the files uploaded to customer's hosting account via 3DVista VT PRO.

- **With Log-in:** Maintains the **log-in option** from the 3DVista app with the possibility for various users to log in to their individual hosting accounts and see the tours hosted on their respective accounts. **No publicly shown virtual tours.** Only users who are familiar with the username and password will be able to access the tours. This may require the use of various 3DVista Hosting Accounts. App content will dynamically adjust and update according to the hosting account associated with the logged-in account.

The same log-in data (username & password) will be used by a) the virtual tour creator for uploading the tours from 3DVista Virtual Tour PRO and b) by app's user when logging in to the app.

## ONLINE TAB

### OPTION 1 / PORTFOLIO APP

### OPTION 2 / DIFF. CLIENTS

|  |   |
|--|---|
| No Log-in, All tours publicly visible                                  | Log-in required, No tours publicly visible (only Highlighted Tours) |
| Linked to <b>ONE</b> 3DVista Hosting Account                           | Linked to <b>VARIOUS</b> 3DVista Hostings Accounts                  |
| Mirrors content of account in real time                                | Mirrors content of respective accounts in real time                 |
| ✗  | Users will only see the tours meant for them                        |
| ✗  | Users need log in data (same credentials you use for uploading)     |
| Manage content at any time and without the need for support by 3DVista |   |
| Add and delete featured tours with one click in VT PRO                 |   |

### • SUBMIT APP AND APP INFO:

- 3DVista will upload client's app to the iTunes Store and Google Play Store
- 3DVista will submit all general app information requested by both App Stores (previously provided by client)
- 3DVista will submit all screenshots and icons necessary requested by both App Stores

The app is **multi-language**, which means it will display in the language of the device (or in English if the device language is not supported). If you want the app specifically in a language that 3DVista does not support, you can send us the translation and we will include it. 3DVista will appear as developer in both Google Play and iTunes App Store. Alternatively, client can also decide to upload the app to the App stores himself in order to be listed as owner and developer of the app. For this, 3DVista expects client to be capable of and solely responsible for the creation and payment of his developer accounts and the submission of the necessary certificates to 3DVista (3DVista delivers basic instructions). In this case, 3DVista will charge an allowance of 149,00€ for the extra effort of incorporating client's certificates. 3DVista will then deliver the final .apk and .ipa app files, which client will have to submit to the app stores using his own developer accounts and at his own risk and expense.

---

## Price

**799€**

All prices exclude VAT (21%), which may apply in Europe

## PAYMENT

At beginning of project ..... 100%

*Prices in the Offer are exclusive of any applicable sales, use, excise, value-added, business transfer, and like taxes and all customs and import export duties, fees, and charges without limitation, and Customer shall pay all such amounts.
